

## Lab 9

## I/O Redirection in Unix Shell

Input:

```
#!/bin/bash

while true
do
    echo "-----"
    echo "      I/O Redirection Manager      "
    echo "-----"
    echo "1. Write to file (Overwrite)"
    echo "2. Append to file"
    echo "3. Display file"
    echo "4. Exit"
    read -p "Enter choice: " ch

    case $ch in
        1)
            read -p "Enter filename: " file
            echo "Enter text (Press CTRL+D to save):"
            cat > "$file"
            echo "File saved."
            ;;
        2)
            read -p "Enter filename: " file
            echo "Enter text to append (Press CTRL+D to save):"
            cat >> "$file"
            echo "Content appended."
            ;;
        3)
            read -p "Enter filename: " file
            if [ -f "$file" ]; then
                echo "--- File Content ---"
                cat "$file"
                echo "-----"
            else
                echo "Error: File '$file' does not exist."
            fi
            ;;
        4)
            echo "Exiting..."
            exit 0
            ;;
        *)
            echo "Invalid choice, please try again."
            ;;
    esac
done
```

Output:

```
Enter choice: 4
ubuntu@ubuntu-OptiPlex-SFF-7020:~/sanjana$ nano hey2.sh
ubuntu@ubuntu-OptiPlex-SFF-7020:~/sanjana$ chmod +x hey2.sh
ubuntu@ubuntu-OptiPlex-SFF-7020:~/sanjana$ ./hey2.sh
